

Scrapbook

I always enjoy using lots of different materials to make a truly personal card. I

found all the little decorations that I needed for this card around the house, but you can buy bits and bobs like these at your local craft supplies shop. You could cut the dress template out of the paper on the next couple of pages or you could choose your own paper. Using a napkin or decoupage paper would work really well too.

Stick the dress onto a piece of thick card and find an envelope that the card will fit in. A few pretty accessories really complete the look.

A CARD FOR MY MOTHER

My parents first set eyes on each other many years ago during a dance at school. My mother still loves to tell the story. She was wearing a yellow dress with white spots that evening. That's why I've made her this card, I know she'll recognise the dress straight away!
